**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-40 and 43-65, drawn to wireless light beam gun, classified in class 463, subclass 51.
  - II. Claim 41, drawn to a coordinate calculation method, classified in class 463, subclass 53.
  - III. Claim 42, drawn to a signal generating method, classified in class 463, subclass 52.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II or III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case product as claimed can be used in a materially different process of using that product such as generating the blip coordinate data not according to the ratio for both the largest pulse number of the V\_sync signals of both wireless game player end device and wireless light beam gun end device.

Art Unit: 3713

3. Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as generating a recovered blip signal and outputting said recovered blip signal to game player. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. This application contains claims directed to the following patentably distinct species of the claimed invention:

If Group I is elected, it is further limited to the following species:

Species 1: Figure 3A.

Species 2: Figure 3B.

Species 3: Figure 4A.

Species 4: Figure 4B.

Species 5: Figure 5A.

Species 6: Figure 5B.

Species 7: Figure 6A.

Species 8: Figure 6B.

Species 9: Figure 7A.

Species 10: Figure 7B.

Species 11: Figure 8A.

Species 12: Figure 8B.

Species 13: Figure 9.

Species 14: Figure 10.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species with corresponding claims for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record

Art Unit: 3713

showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. A telephone call was made to applicant's representative, Mr. Benjamin Urcia on July 9, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Binh-An D. Nguyen whose telephone number is 703-305-5713. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, Primary Examiner Jessica Harrison can be reached on 703-308-2217. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
